Foreword

Skilled, experienced, determined web-applications architect / back-end developer. Serverless Jedi. 10+ years of experience in software development and hosting services. Managed 75+ employees.

Skills

- **AWS Certified Solutions Architect** (valid late 2018)
- **Serverless:** AWS Lambda, REST API
- **Python:** Flask, Django, Chalice, other MVC
- **Databases:** SQL, NoSQL (MongoDB, DynamoDB). HL architecture / optimization.
- **DevOps:** Chef, Nginx, load-balancing, CDN, networking, monitoring
- **30+ AWS Services:** EC2, Lambda, R53, SSM, RDS, DynamoDB, SQS, SNS, S3, CW . . .
- **Agile/Scrum** – but I prefer getting things done to drawing diagrams.
- **Product Management** (3 years)
- Other **not-JS** Programming Languages

Product manager

".masterhost" – **Hosting, datacenters** 2005 – 2007 <http://masterhost.ru/>

Project manager and customer services manager

Afterword

I am comfortable working in a startup or small/medium company. Can design solution architecture from scratch. I like taking significant part in development and can effectively manage/cooperate with Dev and DevOps teams. Hebrew is not my strong side, so the technical language in my team must be English.
